

The Sun.

WEDNESDAY, JANUARY 28, 1874.

Announcements To-day.

Needs of Music To-day.
Brooks Theatre—Theatre des Fleurs.
Bowery Theatre—The School for Scandal.
Don Bryant's Minstrels, Tremont Grove.
Guard Opera House—Hannay Drury Almack.
New York Avenue Theatre—Folies.
Sister Superior—A. L. C. T.
Olympic Theatre—Alma Mater, Savoy, Maliboo.
Stichwitz Hall—Strong Badges.
The Colosseum—Bentley and Tremont Grove, Mexico.
Theatre Comique—Bell Day, Maliboo.
Lyceum—Theatrical Review.
Union Square Theatre—Theatrical Review.
Wallace's Theatre—Vivian.
Weed's Museum—South Jay, Maliboo.

"The Constitution says that all trials shall be by jury, and the accused is entitled to a trial before his peers; and that they are to be convened or adjourned at a time, but not to be convened or adjourned in THE FIRST INSTANCE by a BUREAU."—SAMUEL LEAVITT.

Louisiana—Why Grant Hesitates.

By attempting to force a fraudulent Government upon the Territory of Kansas Mr. BUCHANAN destroyed himself, his Administration, and his party. Not heeding the fate of BUCHANAN and the Democracy, Gen. GRANT, by means far more reprehensible than those employed by his feeble predecessor, has imposed upon Louisiana a State Government vastly worse in every element of fraud, venality, and oppression than that which BUCHANAN tried to fasten upon Kansas.

Such a heavy load to the party has this Louisiana usurpation become that many prominent Republicans, who want to live and flourish after GRANT is politically dead and despised, are searching around for a way out of this miserable business, and for a device of some sort for getting rid of so intolerable a burden. They have upon the oft-used scheme of offering a new election for State officers and a Legislature. But GRANT hesitates; and why?

The answer is plain. Judge DUBUQUE, Marshal PARKARD, Brothers-in-law CASEY, the usurping KELLOGG, poor FENSTERWALD, and sundry messengers and telegraph operators, know a great deal too many facts about the original source whence this plan for overthrowing the lawful Government of that State sprang, to make it safe for GRANT and some of his Cabinet to allow the KELLOGG crowd to be now set aside.

Does anybody imagine that "Uncle's" order whereby WATKINSON, McENERY, and their friends were impeached, and KELLOGG, PRINCIPAL, and their followers were placed in power, sprung from the misguided brain of DUBUQUE? Have people forgotten the mysterious visits of CASTO to Long Branch? of PARKARD to Washington; and how telegrams and messengers were sent back and forth between the Branch Office and the White House, and between both and New Orleans; and that the result was the Draught order, the PARKARD warrant, and the employment of the trooper and r. E. EXOMY to first upset WATKINSON and inaugurate PRINCIPAL's usurpation? Governor, and subsequently to keep McENERY and the lawful Legislature out of the way, and play a trick to get rid of his motley crew in possession?

All the facts relating to these transactions were to come out, the conspirators of high and low degree in Washington and Louisiana would stand appalled, while the country would invoke condign punishment upon their guilty heads. Now, does anybody suppose that GRANT is so fondly in love with his tools in Louisiana to desperation as to turn them out of office, and then tempt them to open their mouths and demand nothing to the harm of him and his accomplices in the hope of averting their own ruin?

Shall These Lives be Saved?

In October, 1869, the New York Foundling Asylum was opened by the Sisters of Charity in East Twelfth street, and a basket of charity was placed in the vestibule for the reception of all infants that might be left, regardless of nationality, creed, or color. In June of the following year, the New York Infant Asylum, an institution of similar aims, began its work under the patronage and management of ladies and gentlemen representing all the Protestant denominations. The amount of good done by these institutions may be estimated by consulting the records of the Coroners' office and the reports of the Board of Health before and since the year 1859.

Prior to that time it seems that infant mortality was of so little value here that it was deemed unnecessary to keep any record of children found dead under suspicious circumstances; but in 1850 the authorities began a record which stands on the Coroner's books thus: "Infants found dead in streets, alleys, rivers, &c., in 1850, 1851, 1852, in 1852, 1853, in 1853, 1854—a gratifying diminution each year. To understand how much more the number might have been reduced in 1853 we must bear in mind that in May of last year, in spite of the aid which had been given to the institutions by the state and city, so many children had accumulated at the New York Foundling Asylum that the Sister Superior in charge found that there was not sufficient money on hand to warrant the reception of all that came. After that month the police report that many dead and abandoned infants were found in and near Washington square, where the asylum then was. In October the Sisters and their benefactors removed to the new asylum in the upper part of the city. From Nov. 8 to Jan. 8 Police Captain GUNNERS reports no less than twelve dead and abandoned children found near the new asylum. All these were found under circumstances showing that they had been taken to the asylum door, but the unfortunate mothers finding no basket in which to deposit their babes, and not having sufficient courage to enter and plead for their reception, had abandoned them to their fate. In one instance a garter around the neck of the little unfortunate had done the work of death."

Dr. ELISHA HARRIS, the Registrar of Records in the Board of Health, adds his testimony to the police and Coroners' reports. "While the Foundling Asylum, he says, "had undoubtedly greatly diminished the number of cases of actual deaths of infants under suspicious circumstances, as proved by statistics, it is impossible to estimate the amount of crime it has arrested in other vague and obscure forms."

Without any disparagement to the work of the sister institution, the Infant Asylum, it must be acknowledged that to the manner of receiving children at the Sisters' Foundling Asylum, in a basket at the door, and no questions asked, may be mainly attributed the decrease in the number of infants found dead under suspicious circumstances from 1850 to 1853. And now that the basket is removed we again find an increase in this pitiful record of crime.

Until that basket is replaced, New York cannot pretend that she has any foundling asylum except in name. We do not mean

becomingly, but not extravagantly; and in order that he might be beyond the caprice or partisanship of Congress, the Constitution declared, after the subject had been exhaustively discussed in the convention in all its phases, that "the President shall, at stated times, receive for his services a compensation, which shall neither be increased nor diminished during the period for which he shall have been elected." That clause made him independent on the one hand of Congress, and on the other it excluded him from exercising undue influence for his own benefit by seeking an increase of compensation. This provision of the supreme law and these uninterfered precedents were never called in question until a corrupt combination was formed, by which Constitution, usage, and decency were overridden in the salary-stealing act.

The records of Congress establish that the movement to double the President's salary was the corner stone of the disgraceful legislation which has existed and still exists such just and general recruitment throughout the country. And it is equally well proved by the most pronounced and accredited Republicans that the President himself was the real author of that scheme, and did more to promote its passage than all other influences by official appeals and personal persuasion.

A subservient Congress was not content with obeying this dictate, but went on and voted at the same time extra and emoluments to the amount of \$75,000, with which the President's expenditures at the White House are reduced to the minimum of providing for his family. In fact, the whole outlay is confined to the actual maintenance of a small private household, and a few state dinners, as they are called, while Congress in session. The public receptions do not cost him a cent. The house, lights, fuel, flowers, servants, and music are all regular charges upon the Treasury, and the only hospitality ever offered is a cold and awkward shake of the hand for State officers and a Legislature.

Green houses, stables, kitchen garden, and other costly luxuries are supplied in addition, to say nothing of \$60,000 a year for "contingencies" and "repairs," and "furniture," which have become such an annual tax that the money granted under these heads since Gen. GRANT came into office would rebuild the Executive Mansion upon a much larger scale than now exists. More than this, the stock provisions of the White House are furnished from the Quartermaster's department at cost.

When Congress, under the fear of popular indignation, recently repealed a part of the inhumane act of last March, it stopped short of justice and of the public demands. The poor pretence of constitutional impediment for not repealing the President's double pay is little less than an insult to SCHUYLER COOLY by the revelations of OAKES AMES' little memorandum book, or that of Miss BROWN by her entrance into the prison on Blackwell's Island. It is no proof for ascribing politicians from the people as if they were a nation of idiots, and Mr. BROWN may yet have occasion to painfully realize this truth.

What is \$30,000 worth by the side of one human life put out in darkness by the hand of a forlorn, desperate woman, and that woman's mother? Fifty diamond rings or brooches glittering in the ears or on the bosoms of fifty of the beautiful women seen any ballroom at the Academy would save five hundred or a thousand such lives. Fifty dollars substituted by one energetic and earnest woman for it in a few months, and when beauty and fashion flock to the house in Twelfth street to work for the babies?
